Writing

I'd like to talk about online education. More and more countries using this various of education on period coronavirus.

In my school in online education we study four four subjects: russian, literature, math and english. But on some subjects we had a homework and I was must read the topic in book, and understand a new theme. Some student didn't connect in programm and didn't got information. They don't study one

month! Online education is bad because:

First we study four subjects of fifteen. Second, some students can't connect to lesson. I think what online education mustn't using already.
